

Planning & Production Control and Coverage

Continuous improvement

www.aertecsolutions.com

Tracking of production process tasks based on the engineering master planning

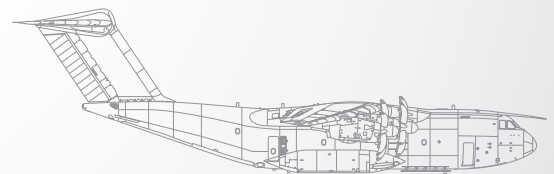

Planning & Production Control and Coverage can make any necessary changes to the duration and order of any production tasks pending, along with the quantity of resources to be assigned. It can even add new tasks to adapt the process to actual day-to-day production needs. It takes into account the real availability of resources, materials, tools, shifts and any other unforeseen circumstances that may arise. It also monitors and controls any OSW from both partners and preceding stations.

Highly experienced consultants with a thorough understanding of Planning & Production Control and Coverage methods processes and tools, in order to support production activities.

Planning & Production Control and Coverage activity provides benefits in terms of time, cost and quality. This is based on continuous improvement, IT tools, know-how and synergies across other programmes.

Preferred Manufacturing Engineering Services Strategic Supplier
(ME3S) for Airbus

Planning & Production Control and Coverage Activities

- | | |
|--|--|
| ▶ Planning and production control activities | ▶ Manage industrial meeting and minutes report |
| ▶ Final Assembly Line (FAL) master plan | ▶ Guarantee the supply chain of materials to FAL |
| ▶ Update unified plan (Up) | ▶ Provide delivery dates of the materials |
| ▶ Operational plans | ▶ Missing parts management of the stations |
| ▶ Process standardisation | ▶ Control of the work order life cycle |
| ▶ Analysis, generation & update of follow-up reports | ▶ Continuous improvement |
| ▶ Support to production | |

Bespoke services

P&PC experts ready to lead and manage

AERTEC Solutions has an extensive workforce of highly qualified engineers with experience in the aeronautical industry. They are trained and certified in some of the following key concepts:

- **Airbus system tool Knowledge TLB & SAP SP1**
- **Project Management Professional (PMP)®**
- **Lean Manufacturing**

Any specific requirements in terms of training in methods and tools can be discussed with the project manager or department leader in charge of the service.

Qualified engineers
with experience
in the aerospace
industry and trained in
Airbus tool systems

Our projects speak for us

A400M

- FAL Complete Manufacturing Engineering Services
- FTC Operational Planning and Production Control
- FAL Operational Planning Production Control and Coverage Management
- FAL REC Planning Production Control and Components Management
- FTC Industrial Coordination Support Services
- FTC Industrial Services
- PMO Services

AERTEC Solutions has been providing P&PC services at the A400M FAL since 2007.
