www.aertecsolutions.com

Integrated into and coordinated with the TECTRATECH INC. international team, AERTEC Solutions is currently carrying out the electromechanical engineering services needed to prepare plans, specifications, cost estimates, engineering studies and reports, along with all kinds of associated engineering services, plan reviews and the preparation of definitive plans.

The design services include fire protection, mechanical facilities, electricity installations, telecommunications installations, supply and sanitation facilities, as well as all the necessary civil works for their proper development and architectural integration into the complex where the works are carried out.
