Technical support for runway resurfacing bids at **London Gatwick Airport & Birmingham International Airport (UK)**

Morgan Sindall / **Masterplanning (2011-2012)**

AERTEC Solutions, together with AMEY, was selected by Morgan Sindall as their Airfield Ground Lighting (AGL) technical consultants for the preparation of the bids for the resurfacing of London Gatwick's runway and the resurfacing and extension of Birmingham International Airport Projects.

AERTEC Solutions and Amey provided their expertise in the AGL fields in BAA airports and all around the world to design the AGL works in relation to the resurfacing of the runways.

The work performed by AERTEC Solutions and AMEY was used by Morgan Sindall both as part of their technical proposal, and also served as the basis for their commercial bid.
