EJ-200 engine test benchMoron de la Frontera Airbase, Seville (Spain)

ITP Site control and supervision, control of materials and health & safety (2001)

- Construction of the test bench for the EJ200 engines corresponding to the European jet fighter aircraft, the Eurofighter Typhoon.
- As promoter of the project, ITP manufacture and assemble part of the engine, with the Air Force being the final receiver and user of the test bench.
- The mission of these facilities will be the testing and running of the engines destined for the airbase.
