→ Manufacturing Engineering Assurance of design department requirements

Aircraft industrial cycle

We provide comprehensive and self-managed manufacturing engineering services for each stage of production, whether elemental manufacturing (electrical harnesses), facilities, assembly and functional testing processes for the following aeronautics programmes: A350, A380, A400M, L&M CN235/C295, A330MRTT, EFA, F7X, etc.

Our services focus on implementation and guarantee of the application of the design department's requirements for the final product; technical assistance for quality and production teams to support discrepancies during production; progress reports (key performance indicators - KPI, dashboards); analysis and classification of costs, management and evaluation of impact, and preparation of action plans.

Highly-experienced engineers with thorough knowledge about methods, processes and tools

Tailor-made services

We play an essential role in the management of aerospace programmes and that is why our qualified personnel are at the forefront of programme and project management.

Ready to work on aeronautical programmes

AERTEC has an extensive workforce of highly-qualified engineers with experience in the aeronautical industry. This team has worked on different product environments at all stages of their entire life cycle.

Our personnel are highly trained and ready to provide innovative solutions to face challenges new.

- Involvement in R&D projects
- Lean manufacturing activities
- General and specific
Airbus training

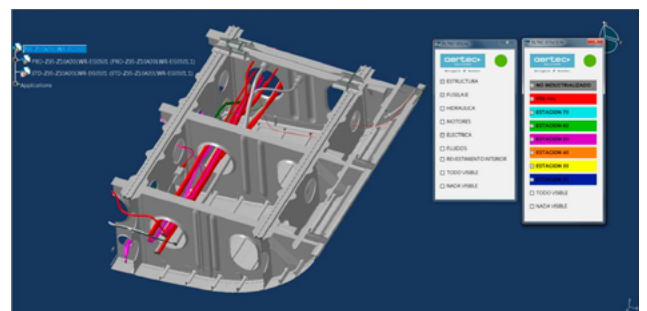

Any specific training needs in terms of either methods or tools will be analysed with the project manager or person in charge of the service. departamento a cargo del servicio.

Preferred strategic supplier for Airbus

Let's talk aeronautics

Our projects **speak for us**

- **A400M, A330MRTT, Light & Medium CN235/C295 and EFA, A380 and F7X**
Process enhancements for military aircraft programmes (Seville and Getafe, Spain)
- **A400M and Light & Medium**
Production control at the electrical components workshop (Seville, Spain)
- **FAL A400M**
Integrated manufacturing engineering services (Seville, Spain)
- **Light & Medium**
Lean manufacturing process engineering (Seville, Spain)
- **A330MRTT**
Manufacturing process engineering (Getafe, Spain)
- **A350 XWB**
Industrialisation and support (Getafe, Spain)
- **A400M MRO and Retrofit**
Integrated manufacturing engineering services (Europe-wide)
- **MRTT MRO and Retrofit**
Functional testing (Europe-wide)
