- Maintenance, monitoring and elaboration of reports on the state of the different groups of the A400M flap support fairing technical division.
- Management of FSF planning via the A400M programme's own tools (Master Plan and Steering Schedule).
- Identification, monitoring and reporting of the risks associated with the study of the integral equipment in the development of the FSF via specific software for the A400M programme (AIRMIS).
- Participation in the "Planning and Risk Management" meetings held by the work teams at EADS.
