Industrial meetings

Normal aircraft activities

The service has been outsourced. AERTEC Solutions' PMOs are therefore located at the client's facilities and integrated into the work teams. Hence, each service is tailored and focused on the type of background needed.

Industrial meetings

Aircraft in working party

Work phases

- Initiation: Identification of the requirements and analysis of possibilities for completion
- Planning: Designing the planning of the tasks to be carried out in each of the jobs that have to be performed, along with an analysis of their coherence and synchronisation
- Closure: Formalising the project's closure

Scope of work

- Flight testing planning and monitoring
- Planning and monitoring of stoppages with technical amendments (working parties)
- Synchronising activities and re-planning tasks
- Attending periodic monitoring meetings and programme status reporting
- Setting the main KPIs

Technical data

- A400M MSN2 / A400M MSN4

Preferred manufacturing engineering supplier (ME3S) for Airbus
