Land Warfare (Spanish Armed Forces) / **Airfield and hangars (2006-2007)**

AERTEC Solutions was appointed to develop a study and assessment of the expansion of the air base of Almagro. This is a helicopters base owned and operated by the air forces of the land warfare of the Spanish Armed Forces.

Our company undertook a comprehensive on-site survey of the existing facilities. Based on that, a multi-criteria analysis was conducted in a number of different scenarios of development. Finally a preliminary assessment of the costs of construction was developed and issued.

As an independent contract, our company was awarded the contract of designing a new multi-storey hangar for in-house maintenance of up to 4 helicopters of the Army, with an overall surface of 4,300 sqm.
